Prateek Bawane - Recognition

To  Harpreet Singh Bamrah
Cc  Prateek Bawane

Harpreet,

I wanted to bring to your attention that Prateek helped us to save the Com'X 210 V6.5 release.

Prateek found a defect with the Com'X 210 that was untested, as the behavior differed from the Com'X 510.

He leveraged the scrum process to inform the team during stand up the Monday of the Thanksgiving Holiday week here in the USA, and the limited team that was here, was able to get the defect resolved before everyone was back the following week.

If Prateek had not been working and found this specific issue, it would have been a major issue in the field.

Prateek saved the V6.5 release.

He's an excellent asset to have on the team. I appreciate his support and all of the work he does to support Com'X.

Thank you,
Darren

Dear All !

An excellent example set by Prateek , by walking the extra mile to find a bug which could have caused issues in ComX210 in the field.

Even though his primary responsibilities are only on development , he kept his eyes open and brought this to team's notice well within time to enable a proper fix for the bug .

I personally appreciate Prateek's commitment to ensure high quality releases from his end , considering that he is currently working alone on ComX development activity.

This kind of dedication sets the standard for all of us **Thank you Prateek** for stepping up as Role Model for all of us.

Harpreet Singh

Congratulations Prateek. It shows your commitment and level of interest in the domain. Really good to see such kind of interest and thinking from customer point of view after long time from a fresher.

Regards,
-Vijay
